STATE CLEARINGHOUSE

NEWSLETTER

JUNE 15 through 30, 2000

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents, federal notices and federal grant applications received by the Clearinghouse during the period June 16 through 30, 2000.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-23018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse.html#clearinghouse

Questions regarding federal grant notices should be directed to Sheila Brown.

Questions regarding processing of environmental documents should be directed to:

Katie Shulte and Karen Fowler (for projects in Northern California)
Scott Morgan and Rob Hill (for projects in Southern California)

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 222) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 1999 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms is available on our website.

Federal Notices

Intergovernmental Review Notices (June 16th – 30th, 2000)

The following are notices received by the State Clearinghouse from federal agencies in compliance with Executive Order 12372. If you would like more information about the subject matter, please contact the agency representative listed below.

AGENCY: Federal Energy Regulatory Commission

CONTACT: Fred E. Springer

TELEPHONE: n/a

ADDRESS: Division of Hydropower Administration and Compliance
Federal Energy Regulatory Commission
Washington, D.C. 20426

DESCRIPTION:

On March 28, 2000, FPL Energy Marine Hydro LLC (licensee) filed a fisheries habitat enhancement plan, pursuant to article 413 of the Order Issuing New License, issued on July 28, 1999 for the Messalonskee Project in Kennebec County, Maine. Article 413 requires the licensee to file a plan to enhance habitat for brown trout by adding shade and instream cover at Messalonskee Stream below the Rice Rips dam. The fisheries habitat enhancement plan should provide sufficient cover to improve summer water temperatures to support brown trout in the Rice Rips bypass reach, and should be approved, as modified.

COMMENT BY: July 12, 2000

Federal Energy Regulatory Commission
Washington, D.C. 20426

DESCRIPTION:

On March 24, the California Department of Water Resources (licensee) filed a plan for stocking trout in Castaic Lake of the California Aqueduct Project located in San Bernadino County. The licensee was required to file a plan on the number of trout to be stocked in consultation with the California Department of Fish and Game (CDFG). As required by the October 25, 1999, Order Modifying and Approving Amendment, the licensee will be filing a fisheries status report (including information about the Castaic Lake fishery) with FERC June 30 of every year beginning in 2002. The licensee's plan

will provide appropriate trout stocking in Castaic Lake, and should, therefore, be approved.

Washington, D.C. 20426

DESCRIPTION:

On December 22, 1999, the City and County of San Francisco filed a Declaration of Intention (DI) concerning the proposed Calaveras Pipeline Power House Project. The proposed project would consist of a powerhouse with a total generating capacity of 1,000kW, and appurtenant facilities to be constructed at the head works of the Sunol Valley Water Treatment Plant (SVWTP). All project works will be located on City-owned land. Project generation will be used by the SVWTP and will partially displace power currently supplied by the City-owned Hetch Hetchy Water and Power utility system. Based on the information provided, the proposed Calaveras Pipeline Powerhouse Project may be eligible for an exemption from licensing under Section 30 of the Federal Power Act.

Federal Energy Regulatory Commission
Washington, D.C. 20426

DESCRIPTION:

September 27, 1999, the Southern California Edison Company, licensee for the Lundy Hydroelectric Project, filed a Final Riparian Disturbance Plan pursuant to Article 406 of the project license, which requires the licensee to file, for Commission approval, a plan to minimize disturbances to riparian wildlife habitat. SCE proposes to relocate 10 camping units currently located in sensitive riparian habitats near the stream to other areas, and will allow natural vegetation to recolonize those riparian areas. In addition, if firewood harvesting along lower Mill Creek is found to be significant in the future, then SCE will propose additional measures to minimize or eliminate the problem. SCE's Final Riparian Disturbance Plan satisfies the requirements of Article 406. Implementation of the plan, in coordination with implementation of the approved Recreation Plan, should adequately protect riparian areas on the Lundy Project lands; therefore, the plan is approved.

COMMENT BY: n/a

AGENCY: Federal Energy Regulatory Commission

CONTACT: Mohamad Fayyad

TELEPHONE: (202) 219-2665

ADDRESS: Division of Hydropower Administration and Compliance
Federal Energy Regulatory Commission
Washington, D.C. 20426

DESCRIPTION: Southern California Edison (SCE) proposes to delete from the license the 4.18-mile-long, 33-kV transmission line of the Santa Ana River No. 1 & No. 2 Project. SCE says the line is part of its transmission and distribution system, and therefore is no longer a project's primary transmission line. Deletion of the transmission line from the license would reduce the amount of federal lands within the project boundary by about 29.22 acres. These lands are administered by the U.S. Forest Service.

COMMENT BY: July 17, 2000

DESCRIPTION:

On May 1, 2000, Southern California Edison (licensee) filed a request for an extension of time to file a final report on fish entrainment at the Rush Creek Project, which is located in Mono and Inyo Counties. In the "Order Approving Fish Entrainment Study Plan" issued April 21, 1998, the licensee is required to file a final report with the Commission by August 1, 2000. The licensee proposes to repeat a portion of the entrainment study to more accurately assess the project related entrainment. The licensee's request for an extension to file a final fish entrainment report by April 1, 2001, is approved by the Commission.

COMMENT BY: July 19, 2000

AGENCY: Federal Energy Regulatory Commission

CONTACT: David P. Boergers

TELEPHONE: n/a

ADDRESS: Federal Energy Regulatory Commission
Washington, D.C. 20426

DESCRIPTION:

On May 7, 1996, an annual license for the Santa Ana River Hydroelectric Project No. 1 and 2 was issued to the Southern California Edison Company (SCE) for a period effective May 1, 1996 through April 30, 1997, and since May of 1996, SCE has operated the project pursuant to annual licenses. On May 31, 2000, California Trout, Inc. filed a petition for rehearing seeking review of the Commission's issuance of the latest annual license to SCE for the period May 1, 2000 to May 1, 2001, arguing that Commission should have required SCE to obtain water quality certification from the State of California under Section 401 of the Clean Water Act prior to issuing an annual license. Since the Federal Power Act mandates that an annual license shall be issued under the terms and conditions of the existing license, its issuance is a non-discretionary act and entails no proceeding in which intervention may be sought; therefore, California Trout's request for rehearing must be rejected.

Yucca Mountain Site Characterization Project
P.O. Box 30307
North Las Vegas, NV 89136-3037

DESCRIPTION:

Since Congress passed the Nuclear Waste Policy Amendments Act in 1987, the Office of Civilian Radioactive Waste Management (OCRWM) has investigated Yucca Mountain, Nevada, as a potential site for a geologic repository for spent nuclear fuel and high-level radioactive waste. Two recent publications, the Viability Assessment (VA) and a draft Environmental Impact Statement (EIS) have analyzed the implications of using Yucca Mountain as a geologic repository, marking progress toward the national decision on geologic disposal. The OCRWM is in the process of completing site characterization and preparing the documents necessary for a possible recommendation of the site.

2000061067	<p>Foothill Boulevard - Damien Avenue to Towne Avenue Los Angeles County Department of Public Works La Verne, Pomona--Los Angeles</p> <p>The proposed project will increase the traffic capacity of an approximately 3-mile section of Foothill Boulevard by increasing the existing two traffic lanes in both directions to three lanes. The project construction will require the removal and construction of raised medians, minor widening and paving of the roadway between Garey and Equation Avenues, and restriping of Foothill Boulevard within the project limits. The project will also require the modification / upgrading of traffic signals and signs, and relocation of utility infrastructure. A No Stopping Any Time zone would be implemented along Foothill Boulevard within the project limits to facilitate a smoother traffic flow, with the exception of approximately 1,000 linear feet along the westbound segment, between Bradford Street and Williams Avenue where a Peak-Period Parking Restriction will be implemented. The proposed project will require the removal of four trees on a median, with height ranging between 15 to 20 feet. The purpose of the project is to reduce traffic congestion and improve traffic flow within the project limits.</p>	Neg	07/14/2000

1991032066	DIABLO GRANDE Stanislaus County MODESTO--STANISLAUS Provide water to Golf Course Resort complex located in Stanislaus	NOD	
1995091032	18903-ZC (Bonita Canyon) Irvine, City of IRVINE/NEWPORT BEACH--ORANGE The CDFG has issued an Agreement Regarding Proposed Stream Alteration (SAA #5-058-00) ("agreement") to the Irvine Company ("applicant") in conjunction with the applicants proposal to alter the streambed for the development of a retail center on a 5.5 acre site, impacting 0.16 acre of stream bed (on average 10 feet wide from bank to bank by 700 linear feet) and an additional 0.19 acre of associated adjacent riparian habitat (mulefat and scattered arroyo willow). The stream bed is currently an ephemeral sandy wash with adjacent mulefat and arroyo willow vegetation associated with the wash. The applicant shall mitigate for the permanent loss of streambed and riparian habitat with the on-site creation of 1.0 acre of alkali marsh and mulefat scrub habitat at the southeast corner of Bison and MacArthur as described in the "Conceptual Mitigation Plan" dated 13 January 2000. The mitigation will expand an existing wetland at the mitigation site by 1.0 acre. The installation of the mitigation shall be done concurrently with the grading of the Bison / MacArthur Retail Center site.	NOD	
1996082050	Pajaro Master Drainage Plan Monterey County The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement (#R3-2000-0259) pursuant to Section 1601 of the Fish and Game Code to the project applicant, G. H. Nichols / Monterey County Public works. The applicant proposes to install a 30 inch diameter pipe with a flap gate and rip rap at the outfall. This pipe is part of a stormwater pumping station.	NOD	
1998071020	MESIVTA OF GREATER LOS ANGELES: PROJECT 97-166(CUP & OPT) Los Angeles County Calabasas--LOS ANGELES The applicant proposes to divert a seasonal creek into 220 feet of culvert for the construction of a new drive way for a school.	NOD	
1998091036	CUP 2804 (American Avenue Landfill) Fresno County The revised permit will allow for the continued operation of landfill activities with an increase in tonnage from 1,200 tons per day to a daily average of 2,200 tons per day, and a peak of 3,600 tons per day; define and / or increase the permitted area from 190 acres to 440 acres, define and expand the disposal footprint to be 361 acres; specify the maximum depth to be 145 feet above mean sea level; extend the closure date to 2031; and construction of new cells in accordance with Subtitle D regulatory requirements.	NOD

2000021036	Standardized Permit for Romic Environmental Technologies, Corporation, dba Automotive Environmental Services Toxic Substances Control, Department of, California Environmental Protection Agency Irwindale--Los Angeles The project involves the approval of a standardized permit to operate a waste antifreeze storage facility.	NOD	
2000031071	Hollister Air Attack Base CDF Relocation Project Forestry And Fire Protection, Department of Hollister--San Benito The project consists of the acquisition and construction of a 5,280 square foot office building with a dispatch/observation tower, a 2,040 square foot airbase shop and 4-bay garage, a 400 square foot generator building, a 400 square foot aircraft mechanic shop and a 6,000 square foot automotive maintenance shop and bulldozer/transport building. Other new facility features are paving, air tanker loading pad, aircraft areas, retardant mixing systems, and security controls. Site work includes grading, drainage, and compacting the soil, cutting trenches, laying electrical conduits, and installing telephone lines, cable television, water, sewer systems and gas lines. The existing facility will be demolished and removed from the site. The proposed project is necessary because the existing CDF Hollister Air Attack Base Facility no longer meets safety and operational needs.	NOD	
2000032091	Fortuna CDF Fprest Fire Station Relocation Project Forestry And Fire Protection, Department of Fortuna, Loleta--Humboldt The proposed project consists of the property acquisition and construction of a standard CDF two-engine forest fire station with a bulldozer shed, battalion chief, and resource management offices. The proposed forest fire station would also have a 2,990 sq. ft. barracks and kitchen; a 3-bay apparatus building, a storage room for hazardous materials, vehicle and fire hose wash facility, fueling station, perimeter fencing, utilities, landscaping, and paving. The current facility would be converted to office space. In addition, CDF may add an automotive shop to the new facility within the next 2-5 years.	NOD	
2000041074	Replacement and Rehabilitation of the Back Bay Trunk Sewer Orange County Sanitation District Newport Beach--Orange The Orange County Sanitation District (OCSD) proposes a project to rehabilitate (by lining) and replace a major portion of the Back Bay Trunk Sewer (BBTS), Contract No. 5-46 to prevent further deterioration. The proposed project, alternative B-1 of the February 2000 Preliminary Design Report by Tran Consulting Engineers, calls for lining of the existing pipe which lies within Big Canyon and paralleling the remaining portions of the pipeline with two plastic pipelines (each being 30 inches in diameter). The construction would be staged in various segments to facilitate construction that requires road closures and tie-ins with the existing pipeline. At critical junction points, new junction structures would be constructed along with new manholes along the route. A Spill Prevention Program will be an important element of the construction and tie-ins.	NOD

1998102033	Final Program Environmental Impact Report for the Vegetation Management Program Forestry And Fire Protection, Department of -- The proposed program would expand CDF's ability to reduce fuel hazards by authorizing treatment options within additional vegetation types and jurisdictional areas. The goals of this program are to reduce fire hazards, suppression costs, and loss of life, property, and high-value resources and to enhance resource values by one or a combination of fuelbreak, fuel reduction zone or residential fuel treatments. Three primary techniques are proposed: prescribed fire, mechanical and hand treatment methods. The incorporated environmental checklist and mitigation-monitoring plan ensure that fuel management activities will be conducted in a manner that minimizes the impacts to: state and federally listed rare, threatened and endangered species, air and water quality, vegetation and timber resources, wetlands and riparian lands, the economic and social environment, and others. The proposed program is consistent with SB 1704, California Fire Plan (California State Board of Forestry and Fire Protection) and the California Forest Practice Rules (Title 14, CCR, Chapters 4 and 4.5)	NOD

2000032119	Pavement Rehabilitation and Bridge Replacements Department of Transportation Truckee--Nevada CDFG is executing a SAA pursuant to Section 1601 of the Fish and Game Code to the project applicant, California Department of Transportation, District 3. The applicant proposes to demolish and replace bridges, refurbish slope protection, and line existing culverts.	NOD	
2000041028	Fenner Canyon Conservation Camp Replacement Project Forestry And Fire Protection, Department of --Los Angeles The proposed project consists of constructing an administrative building, a utility vehicle storage facility, and two vehicle storage facilities to house crew carry vehicles (CCVs) and demolishing an existing storage facility. This project is necessary to address the physical deficiencies of the existing buildings and maintenance issues associated with California Department of Forestry and Fire Protection vehicles. The new administrative facility is needed to replace the existing aging facility, which does not meet current Americans with Disabilities Act requirements. The purposes of constructing new CCV and utility vehicle storage facilities are to protect these vehicles from the elements and to reduce the number of vehicle maintenance problems associated with outdoor storage.	NOD	
2000041059	Dursol Laguna County Sanitation District Santa Maria, Orcutt--Santa Barbara Construction of trunk sewer line from Orcutt to the wastewater treatment plant. Project also removes 2 lift stations.	NOD	
2000041094	Site Plan No. 99-22, Tentative Parcel Map No. 15471, CUP No. 99-16 Upland, City of Upland--San Bernardino The proposed project involves the submittal of a design review application for approval of a 163,268 square foot home improvement store with outdoor gardening center and a Tentative Parcel Map to subdivide the existing land area into two parcels separating the project site with proposed access from Foothill Boulevard and Benson Avenue.	NOD	
2000041109	Premier Cinema Plaza (Site Plan Review #99-14 and GPA #99-01) Los Banos, City of Los Banos--Merced (1) General Plan Amendment for approximately 6.2 acres from LI (Light Industrial) to C (Commercial) to allow the planned development of a theater complex with retail and incubator pads. (2) Site Plan Review to allow development of a mixed-use commercial center consisting of an eight-screen theater, a 13,150 square-foot pad for retail use, and a 15,085 square foot building pad for mixed retail and industrial incubator business uses. 2000042021	Baseline Conservation Camp CDF Replacement Project Forestry And Fire Protection, Department of Jamestown--Tuolumne The proposed project would involve constructing two crew-carrying vehicle apparatus buildings, a bulldozer storage shed, and an administration building, renovating the automotive shop building and dining facility, and paving portions of the site. This project is necessary because the camp lacks essential facilities that were not provided as part of the original construction project in 1991. In addition, portions of the site require paving to maintain adequate access during storms.	NOD	
2000052019	Dew Drop CDF Forest Fire Station Replacement Project Forestry and Fire Protection Pioneer--Amador The proposed project would involve demolishing an existing apparatus building, barracks building, storage building, and fuel station; constructing replacement barracks, apparatus, and fuel station buildings; installing a 20,000 gallon water tank; and paving portions of the site. This project is necessary because both the layout of the station and the design of the buildings are no longer compatible with the station's modern equipment and the barracks building cannot accommodate the current number of station personnel.	NOD	
2000069016	Timber Harvest Plan 1-99-392 SCR Class II Crossing Forestry and Fire Protection --Santa Cruz The applicant proposes installation of culverted crossings at three locations on a Class III stream (Browns Creek, Santa Cruz County). 	culvert road and trail crossings, implement erosion control measures.		
2000069020	Elkhorn Boulevard Pipeline Project, 49AD Sacramento, City of Sacramento--Sacramento Elkhorn Boulevard Pipeline Relocation Project - The project is part of the North Natomas Comprehensive Drainage Plan flood control improvements. Currently 380 acres of farmland, north of Elkhorn Boulevard and 7,000 feet west of the East Drainage Canal drains into the Reclamation District 1000 C-2 drain, which discharges into the East Drainage Canal, south of Del Paso Road. Three alternative drainage methods are proposed to move the discharge location of the agricultural drainage from the C-2 drain and transport the water to the East Drainage Canal. Alternative 1A would intercept drainage from the C-2 drain via an existing channel that would be widened (north of Elkhorn Blvd.), a channel that would be constructed (north of Elkhorn Blvd.), and then through a new pipeline (south of Elkhorn Blvd.) that would transport water to the East Drainage Canal. Alternative 1B would intercept drainage from the C-2 drain and transport water to the East drainage Canal via a channel that would be constructed south of Elkhorn Blvd to a new pipeline. Alternative 2 would intercept drainage water from the C-2 drain and transport it via a new pipeline south of Elkhorn Blvd. to the East Drainage Canal. The City's preferred alternative is Alternative 2.	NOD

1998081027	Merced College/Meadowlands II Annexation Revised Draft EIR Los Banos, City of Los Banos--Merced The City of Los Banos has prepared an Area Plan for approx. 495 acres. Included in the Area Plan is the Meadowlands I Development (approx. 116.8 acres) which was recently the subject of a Zone Change (#98-01), Vesting Tentative Tract Map (#98-01), and Development Agreement (#98-02) and approved by the City of Los Banos. The recent approved project initiated the land use design program that will be expanded and carried out through the remaining 378 acres of the proposed Area Plan. Implementation of the Area Plan will require the annexation of approximately 362 acres of land currently in the unincorporated territory of Merced County. Also included in the Project Area (unincorporated territory) is the proposed Merced College site, consisting of approx. 95 acres and 30 acres east of the San Luis Canal to be used for open space or public infrastructure (drainage and low intensity recreational) purposes. The Project Area considers and complements proposed future development along its westerly boundaries and the interconnection of public infrastructure (streets, water, sewer, drainage, and other public facilities and utilities) to ensure that there is continuity of growth and development in the City of Los Banos. Caltrans proposes to construct a new nine mile section of State Route 58 on a new alignment. The new highway section will include a bridge at Cache Creek. The SAA establishes conditions to protect fish and wildlife resources and to restore habitat values that will be impacted during construction activities. Prior to commencing ground disturbing activities at the site, the Department will also issue to Caltrans a California Endangered Species Act Section 2081 Incidental Take Permit. Upon approval of the Incidental Take Permit, a second Notice of Determination will be submitted.	NOD	
2000031088	Santa Rosa Creek Riparian Restoration Plan Santa Barbara County Flood Control District Buellton, Lompoc--Santa Barbara In an effort to restore a severely eroded section of Santa Rosa Creek, a grade stabilization structure will be constructed. In addition, 10 side drains will be repaired, 6 sheet pile check structures will be installed and a habitat restoration plan will be implemented.	NOD	
2000032093	Koehler--Reclamation Plan Sierra County Plumas--Sierra Special Use Permit and Reclamation Plan for the removal of 10,000 cubic yards of gravel from an old tailings pile and reclamation of the site.	NOD

2000041038	First Street Culvert Replacement Project Gonzales, City of Gonzales--Monterey The applicant proposes Culvert replacement at the 1st, 5th, and 7th Street undercrossings along Gonzales Slough. The CDFG is executing SAA# 1225-99 pursuant to Section 1601 of the Fish and Game Code to the project applicant, City of Gonzales, Public Works / Mr. Walter Grant.	NOD	
2000041051	North County Community School San Luis Obispo County Atascadero--San Luis Obispo Acquisition of an 8.13-acre site and construction of community school of approximately 10,000 square foot single story masonry construction, to house no more than 100 students. This is necessary to maintain the current level of educational services offered to children in the County and to mitigate overcrowding of the County's school facilities caused by new residential construction and industrial development.	NOD	
2000042007	Thomes Creek Rock Gravel Mining Operation Fish & Game HQ --Tehama CDFG is executing SAA# 99-0422 pursuant to Section 1603 of the Fish and Game Code to the project applicant, Mr. Vern Jackson representing Thomes Creek Rock. The applicant proposes a bar skimming operation on Thomes Creek, Tehama County.	NOD	
2000042078	Arnold Drive Bridge Repainting Project Sonoma County --Sonoma The project will involve cleaning and repainting all steel portions of the bridge using a containment system that is adequate to contain all visible dust, water and debris. The final color was selected by the County Landmarks Commission and is battleship grey. In addition, the 18 inch cast iron sewer pipe that hangs on the east side of the bridge will receive additional structural support.	NOD	
2000042090	JFK Memorial Park Trail Napa, City of Napa--Napa The project is a 3,290 linear-foot segment of paved surface, shared use trail for bicyclists and pedestrians. Located within Kennedy Park in the City of Napa, the trail extends from Highway 121 to the Park's turf activity area west of the duck pond. The total 14-ft. trailbed sections reflect a 10-ft. width for bicycles, with centerline pavement markings. There are 2-ft. shoulders on either side of the trail, one side to be used by joggers and walkers, and the other to provide a 2-ft. separation between the trail and vegetation. Materials consist of a 2-in. asphalt paving area over a 4-in. compacted aggregate sub-base.	NOD

2000061116	University City Village San Diego, City of San Diego, University City--San Diego To renovate and redevelop a 75 acre senior residential complex with 599 units.	Neg	07/26/2000
2000061119	Canyon Estates - TTM 16104, General Plan Amendment 00GPA01. Planned Development Plan 00PD01, Zoning Amendment 00ZA01 Chino Hills, City of Chino, Brea--San Bernardino Canyon Estates is a proposal by Catellus Residential to develop 59 single-family lots on a 299-acre site. The developed portion of the proposed project would encompass approximately 72 acres on the northern portion of the site. The southern portion of the site, consisting of approximately 227 acres, is proposed to remain as natural open space. The site is designated Agriculture / Ranches in the City General Plan and zoned Agriculture-Ranch (R-A), permitting up to 0.2 dwelling units per acre. Maximum development of the Project site permitted under the General Plan is 59 dwelling units. The applicant is proposing to develop the project through a planned development plan in order to cluster the units in the flattest area of the site and the area of least environmental disturbance. If approved, the Canyon Estates Planned Development Plan would change the zoning of the property from R-A to Planned Development (PD). To provide vehicular access to the site, the project proposes to downgrade Soquel Canyon Parkway between Pipeline and Peyton Avenues (Loop 1) from a 6-lane Major Arterial, as currently designated in the General Plan Circulation Element, to a 2-lane Collector.	Neg	07/26/2000
2000061120	Latigo Canyon Road at Culvert Marker 4.87 Los Angeles County Department of Public Works Malibu--Los Angeles The project involves remediating surficial sliding of the hillside along Latigo Canyon Road in the vicinity of Culvert Marker 4.87. The material will be excavated and recompacted to 90 percent compaction. The project also involves constructing subdrainage systems beneath the graded hillside area to carry subsurface flow towards the adjacent culvert and removal and reconstruction of an approximate 110-foot long section of the upper Latigo Canyon Road. Upon project completion, the impacted area will be revegetated with native vegetation. The project area is approximately 59,000 square feet.	Neg	07/26/2000

2000062135	Paradise Park Minor Land Division Santa Cruz County Felton, Santa Cruz--Santa Cruz Application No. 99-0345 is a proposal to create three single family residential parcels for the future construction of three private single-family dwellings from a portion of the single parcel known as Paradise Park. The proposal requires an Ordinance Amendment to Planned Unit Development 74-783- PUD/80-116-PUD (which were approved by ordinance); a Minor Land Division; a Roadway/Roadside Exception to reduce the required width of the right-of-way access from 40 feet to 24 feet pursuant to County Code 13.10.521 (a) and 15.10.050(e)(5); a Roadway/Roadside Exception to reduce the required local street width from 56 feet to 40 feet, to eliminate separated sidewalk and to provide turn-outs in lieu of a full cul-de-sac; a design waiver to eliminate the requirement to submit specific architecture and instead use the architectural design guidelines established for the adjacent Graham Hill Estates Subdivision; and preliminary grading approval to cut 298 cubic yards to construct the access right-of-way and local street. The project is located at the west end of an unnamed 24 foot right-of-way, about 190 feet west of Henry Cowell Drive, and is accessed through the Graham Hill Estates Subdivision.	Neg	07/26/2000
2000062136	Seascape Gully Repair/Drainage Project Santa Cruz County --Santa Cruz The slope located directly above the dwellings on Dolphin Drive and its interesting cul-de-sacs frequently gets saturated with surface and subsurface drainage during the winter season. There have been instability problems in certain locations on this slope due to this saturation. These failures threaten several adjoining residential properties located directly down slope from the failures. A previous property owner constructed a concrete drainage ditch perpendicular to this slope several years ago to convey surface drainage away from unstable areas and to reduce the amount of runoff percolating into the soil at these problem locations. In addition, a series of check dams were constructed at the outfall end of the drainage ditch to slow flow velocity and minimize erosion. These improvements have been severely damaged over the years by high velocity runoff due to	Neg	07/26/2000

2000064010	Upper Newport Bay Ecosystem Restoration Project U.S. Army Corps of Engineers Newport Beach--Orange Develop a long-term management plan to control sediment deposition in Upper Newport Bay to preserve the health of its habitats.	JD	08/14/2000
1990010930	Santa Maria Cemetery District Acquisition Santa Maria, City of Santa Maria--Santa Barbara Acquire 44 acres for expansion of the cemetery and construction of public roads. City of Santa Maria residents will benefit by expended cemetery service and road connection through portions of the city.	NOP	07/27/2000
2000062141	General Plan Amendment (File No. GP00-06-004) for Fruitdale Station San Jose, City of San Jose--Santa Clara The proposed project consists of General Plan amendments and a subsequent Planned Development (PD) Rezoning to allow development of 200,000 square feet of office space, 30,000 square feet of commercial use, and 400 residential units. The project includes a General Plan amendment to change the land use designation on a 2.7-acre portion of the site from Transit Corridor Residential (25+ DU/AC) to Mixed Use with No Underlying Land Use Designation, and will include a related General Plan text amendment describing the proposed mix of uses. The General Plan amendments would allow office uses, as well as commercial and office uses, along the western boundary of the site. The existing underlying designation for the overall 12-acre site is Transit Corridor Residential (25+ DU/AC). The Transit Oriented Development Corridor General Plan land use overlay currently covers a portion of the site in close proximity to Southwest Expressway. The existing property currently contains commercial development, including a K-mart and 7-11 store. The subsequent Planned Development Rezoning will be filed on the entire 12 acre site and will be available for review prior to circulation of the Draft EIR.	NOP	07/27/2000
2000061134	Creekside Village Calabasas, City of Calabasas--Los Angeles The proposed project consists of the development of a 57,287 square foot Albertson's supermarket and an additional 11,655 square feet of two-story office space (including an ancillary commercial retail structure at the southwest corner of the development boundary). 2000068251	Boat Wash Rack Lighting (99/00-CD-32) Parks and Recreation, Department of --Imperial Project consists of removing and replacing two light poles, adding electrical conduit from the boat washing-rack to a storage building ("the Shed"), removing an unused wind warning light pole, and adding lighting to the promenade at Salton Sea SRA. No potential for significant impacts to the environment is anticipated.	NOE	
2000068252	Exhibits in Robinson-Rose (99/00-SD-34) Parks and Recreation, Department of --San Diego Project consists of replacing and upgrading exhibits and interpretation panels in the Robinson-Rose Building in Old Town SHP to meet current ADA guidelines. No potential for significant impacts to the environment is anticipated.	NOE	
2000068253	Drainage Restoration: Upper Jordan Gulch (East Branch) University of California, Santa Cruz Santa Cruz--Santa Cruz Existing poorly designed waterbars and earthen ditches in and adjacent to Spring Road would be replaced with properly designed earthen ditches and waterbars, and the gravel roadbed would be recontoured to slope northward toward the new ditch (using mechanized equipment). Two undersized (4-inch and 12-inch) metal pipe culverts that convey runoff beneath the road to the drainage would be replaced with an adequately sized (24-inch) pipe culvert. All road runoff from the culvert would be directed to a new compacted earth inlet basin, from which it would enter a new subsurface, 300-foot long, 18-inch diameter metal pipe culvert to be installed west of the channel. (Trenching with a backhoe to allow the installation of the northernmost 225 feet of the pipe would occur within a fenced, 20-foot wide corridor along the pipe alignment; the remaining approximately 75 feet of the pipe near the drainage channel would be installed above-ground, with no mechanized trenching required.) The proposed pipe alignment would avoid all mature trees, but saplings and shrubs would be removed. The resulting vegetation loss would be temporary, and it is expected that native species would soon re-colonize the site. Flows from the pipe would be discharged to a rock energy dissipator within the channel. As many as four wooden check dams would be installed within the natural drainage channel using hand tools. Erosion from seepage from the perched aquifer would be controlled by the installation of a 4-inch, perforated plastic subsurface drain line that would collect subsurface flows and direct them to the natural drainage. Areas of Disturbed soils will be seeded with barley and mulched with straw to prevent surface erosion.	NOE	
2000068254	An Agreement to Convey Land with the City of Marina and the Redevelopment Agency of the City of Marina, by the Univ. of CA University of California, Santa Cruz --Monterey The proposed project is the signing by the University of California of an agreement to convey, provide infrastructure, and waive obligations for the development of properties with the City of Marina and the Redevelopment Agency of the City of Marina. The agreement provides for the granting of a roadway easement and the conveyance of land along the southern edge of a 2,410-foot segment of Neeson Road from its intersection with Imjin Road to a point near its western terminus. A	NOE

2000021078	<p>Northeast Interceptor Sewer and Eagle Rock Interceptor Sewer Los Angeles, City of Eagle Rock--Los Angeles</p> <p>The proposed project is the construction and operation of the Northwest Interceptor Sewer (NEIS) and the Eagle Rock Interceptor Sewer (ERIS). NEIS would extend from Mission Road and Jesse Street in downtown LA northward to the intersection of San Fernando Road and Division Street. This sewer would be constructed by tunneling. ERIS would terminate at two locations (it branches), Eagle Rock Boulevard and Fairpark Avenue and near York Boulevard and Avenue 51.</p>	EIR	08/14/2000
1999011045	<p>Entrada de Santa Barbara and Lower State Street Improvements Santa Barbara, City of Santa Barbara--Santa Barbara</p> <p>The proposed project involves the redevelopment of three major blocks of properties at the intersection of State Street and Mason Street with a total of 17,532 square feet of commercial retail uses and 81 vacation ownership units. The 81 vacation ownership units each have a lock-out unit, thereby providing for the possibility of a total of 162 transient lodging units. A total of 210 parking spaces are proposed, including a 145-space parking structure south of the railroad right-of-way between State Street and Helena Avenue. Public right-of-way alterations are also proposed, including a reconfiguration of on-street parking on Mason Street and Helena Avenue, a widening of the sidewalk and narrowing of the State Street roadway along the project frontage consistent with the State Street Plaza design north of U.S. Highway 101, and other alterations. These alterations are proposed in cooperation with the Redevelopment Agency, to allow for the consistent development of the portion State Street between the railroad right-of-way and Cabrillo Boulevard. A traffic signal is also proposed at the intersection of State Street and Mason Street. A 2,500 square foot Visitor Information Center (VIC) is also proposed within the proposed project (in addition to the 17,532 square feet of commercial uses) along State Street adjacent to the railroad tracks. The proposed VIC would provide its required parking within the surface parking lot previously approved for 125 State Street as part of the Coastal Development Permit for the Railroad Depot Improvement Project.</p>	NOP	07/28/2000
2000061137	<p>Home Depot Commercial Center Signal Hill, City of Signal Hill--Los Angeles</p> <p>Mixed-Use Retail/Commercial Center anchored by Home Depot home improvement and garden center, on the site of an operational oil well field. The project would be built on approximately 23.5 acres of land bordered by the I-405 Freeway on the north, California Street on the east, Spring Street on the south and Atlantic Avenue on the west. The proposed site plan includes approximately 212,726 square feet of building/building pad area, comprised of the following: The Home Depot home improvement center: 107,920 square feet. The Home Depot outdoor garden center: 24,000 square feet, Major Retail Tenant building #2: 32,200 square feet, Major Retail building #3: 25,000 square feet, and four "outpads," ranging in size from 2,500 square feet to 7,500 square feet. Potential commercial uses that could be developed on the outpads include specialty retail, sit-down and drive through restaurants, or other uses permitted in the City's CG</p>	NOP	07/28/2000

The slope stabilization measures include geotechnical remediation within the area adjacent to the roadway and the installation of new storm drain facilities to transport runoff to the toe of the slope.	Neg	07/28/2000
2000062137	Amendment of Sewage Disposal Ord. and General Plan Santa Cruz County --Santa Cruz Proposal to amend the Sewage Disposal Ordinance (Chapter 7.38 of the County Code) and related General Plan policy 5.5.5 to allow commercial development on parcels less than one acre in commercial areas of the San Lorenzo Valley (Felton, Ben Lomond, and Boulder Creek), facilitate cluster development for new subdivisions, allow deeper leachfields in specific circumstances, require ongoing septic system maintenance and make other refinements of existing provisions.	Neg	07/26/2000
2000062145	UCDNet2 University of California, Davis Davis--Yolo, Solano The University of California, Davis, proposes to construct and operate the UCDNet2 Project on the UC Davis campus. The project would extend the existing campus fiber optic infrastructure into areas of the campus which currently do not have access to existing services or where the level of service is inadequate for anticipated growth. These areas include: (1) the Research Park complex, (2) buildings and facilities in the West Campus, (3) buildings and facilities in the South Campus, and (4) a few facilities in the Central Campus. The project would include the construction of two 300-square foot equipment buildings. One structure would be on the West Campus approximately 20 feet north of the Pomology Headquarters on the east side of Hopkins Road. The second structure would be on the South Campus located approximately 1/4 mile south of Interstate 80 and approximately 50 feet west of Old Davis Road. The UCDNet2 project also includes underground installation of approximately 12 miles of new fiber optic cable conduit in the Central, West, and South Campuses through a combination of trenching and horizontal boring to place new conduits. At other locations, existing conduits will be used. The project also includes the installation of fiber optic cables within existing buildings including the construction and remodeling of telecommunications closets, as required, and the installation of network electronics. 1999024003	<p>City of Sacramento Fish Screen Replacement Project U.S. Bureau of Reclamation Sacramento--Sacramento</p> <p>The project is a joint effort by the City of Sacramento and the US Bureau of Reclamation to bring the fish screens at the Fairbairn and Sacramento River WTP's intake structures into compliance with current National Marine Fisheries Service and California Department of Fish and Game fish screening criteria. The project will include an approximately 80-foot-long extension of the existing Fairbairn WTP intake structure on the American River, including retrofitting of existing screens, placement of new screens and installation of a screen cleaning system. The existing Sacramento River WTP intake structure cannot accommodate the new screening requirements; therefore along the Sacramento River, the project involves construction of an approximately 180-foot-long new intake structure, fitted with new screens and a screen cleaning system. The project will increase protection of juvenile fish at both intake structures by lowering the approach velocity and reducing the mesh size of the screens, thereby reducing the chances that fish would be impinged or entrained into the screens. The project also facilitates continued delivery of water to the City.</p>	NOD	
1999031095	<p>San Carlos Inn Project Carmel, City of Pacific Grove--Monterey</p> <p>Demolition of a small commercial real estate office and two apartments fronting San Carlos Street, and a converted single-family residence with attached subordinate unit within the basement which fronts on Mission Street. After demolition, a 13-unit residential care facility will be constructed on 4,335 sq.ft. of the 8,500 sq. ft. parcel.</p>	NOD

1999081066	Whitewater River Basin (Thousand Palms) U.S. Army Corps of Engineers Thousand Palms--Riverside Construction of facilities to provide flood protection from alluvial fan flooding between the Indio Hills and the I-10 freeway, in the vicinity of Thousand Palms, California. NOP was filed by the Coachella Valley Water District. Subsequently, the joint Draft EIR / EIS has been filed by the US Army Corps of Engineers.	JD	08/14/2000
2000061141	Pier J South Marine Terminal Project Long Beach, Port of Long Beach--Los Angeles Redevelopment of approximately 400 acres of marine container terminal space including filling of approximately 1/2 acres of water area, removal of 15 acres of existing land, and construction of wharves, buildings, and utilities.	NOP	07/31/2000
2000061145	Valley Plaza Revitalization and First Amendment to the Earthquake Disaster Assistance Plan for the Laurel Canyon Los Angeles, City of North Hollywood--Los Angeles The Valley Plaza would provide for an array of uses on the proposed site, including retail, office, restaurant, and entertainment uses. The proposed project would include the construction of up to approximately 1.2 million square feet of new floor area. Of the 960,000 existing square feet, approximately 675,000 square feet would be demolished and approximately 285,000 square feet would be retained as part of the proposed project. The Valley Plaza project would contain a total of 1,485,000 square feet. The proposed project includes the renovation and expansion of the existing Sears retail store, as well as the restoration of the existing Wells Fargo office tower. New development on the project site, south of Victory Boulevard, would primarily include retail and restaurant uses, as well as offices uses. Uses within the portion of the project site, north of Victory Boulevard, would include cinema, retail, and restaurant uses. Within northern portion of the project site north of Victory Boulevard, the Valley Plaza project may include the development of an educational facility in cooperation with the LAUSD. This facility could comprise approximately 350,000 square feet (additional to the 1.2 million new square feet proposed for the other uses). As an alternative to the educational facility this portion of the project site could be developed with approximately 90,000 square feet of retail uses and 13,000 square feet of restaurant uses. The Valley Plaza project also may activate and increase the use of Valley Plaza Park. Concurrent with the Valley Plaza project, the Earthquake Disaster Assistance Project would be amended to allow properties within the Valley Plaza project would site boundaries to be acquired by the Agency through the use of eminent domain. The Valley Plaza project would provide for the redevelopment of nearly	NOP	07/31/2000

	20 percent of the land area within the Earthquake Disaster Assistance Project Area.		
2000062155	Northeast Stockton High School Stockton Unified School District Stockton--San Joaquin The SUSD is experiencing substantial overcrowding in existing facilities at the high school level. The proposed project would relieve this need through acquisition and development of a new senior high school on a 50-acre site. The proposed high school would be designed to accommodate 2,000 students with the potential to expand to accommodate up to 2,200 students. The project will likely require annexation of the selected site into the City of Stockton, and the Stockton General Plan will need to be amended to reflect the proposed high school location.	NOP	07/31/2000
2000071009	Recreation Center Expansion (Addition) Santa Barbara, University of California Santa Barbara--Santa Barbara The proposed Recreation Center Expansion (Addition) will involve the construction of approximately 56,1000 gross square feet of recreational uses. Proposed uses include a multi-activity court, climbing wall, cardio/weight room, locker room, multi-purpose space, and support spaces.	NOP	08/04/2000
1998071089	Beverly Hills Groundwater Project (Water Well Amendment) Beverly Hills, City of Beverly Hills--Los Angeles A new water well is proposed to be developed near Santa Monica Boulevard & Canon Drive. This well would replace one developed on Burton Way (median) near Oakhurst Drive, which was found to have water unsuitable for the Groundwater Project. The Groundwater Project as approved in 1998 is the development and operation of four water wells, a water treatment plant, and pipelines connecting these facilities to each other and to the City's water distribution system. Only the wells have been developed at this point in time.	Neg	07/31/2000
2000052025	U.S. Pipe and Foundry Company Landfill Closure and Reopening Union City Union City--Alameda The U.S. Pipe and Foundry Company has proposed to close its approximately 8-acre Class II (special waste) landfill at the 1295 Whipple Road facility (See Figure 1) while concurrently opening an adjacent 6.9-acre (solid waste) Class III landfill. The landfill closure and expansion will be implemented in accordance with California State Code Title 27, Division 2, Chapter 3, Section 2, Article 2 as well as other federal, state and local statutes.	Neg	07/31/2000
2000061142	Powell Minor Subdivision San Diego County, DPLU Ramona--San Diego The project is the minor subdivision of 18.2 acres into 2 parcels and a remainder parcel for single-family residences. Parcels will range in size from 8.5 acres to 5.1 acres gross. The project will be served by wells and will have on-site sewage disposal systems. An existing road that serves all 3 parcels will be improved as part of the project. The inter-mountain Volunteer Fire Department will provide fire service.	Neg	07/31/2000

	storage capacity in Lake Success for irrigation water.		
1999062093	Suggested Control Measure for Architectural Coatings Air Resources Board -- The proposed project is designed to reduce volatile organic compound (VOC) emissions from architectural coatings. The proposed SCM sets allowable VOC content limits for a number of architectural coating categories, including categories such as flats, non-flats, industrial maintenance coatings, lacquers, floor coatings, stains, rust preventative coatings, quick-dry enamels, "primers, sealers, and undercoats," etc. The proposed VOC limits have effective dates of January 1, 2004, for industrial maintenance coatings and January 1, 2003, for all other coating categories. Other components of the proposed SCM include a three-year "sell-through" provision (for coatings manufactured before the applicable effective dates), definitions, test methods, standards for painting practices and thinning of coatings, and container labeling and reporting requirements. The Draft Program EIR concludes that no significant adverse environmental effects would result from the proposed project.	NOD	
1999121094	Thompson Creek Dam Los Angeles County Department of Public Works Claremont--Los Angeles CDFG is executing SAA # 5-086-00 pursuant to Section 1601 of the Fish and Game Code to the project applicant, Los Angeles County Department of Public Works - Water Resources Division. The applicant proposes to seismic retrofit the Thompson Creek Dam.	NOD	
2000012048	Application to Appropriate Water No. 29858 Water Resources Control Board, State Calistoga--Sonoma, Napa Under Application 29858, the project applicant proposes to construct an on-stream reservoir on an Unnamed Stream for the direct diversion and storage of 35 acre-feet per annum (afa). The project will include land preparation, cultivation, and planting of wine grapes within existing crop land and nonnative grassland areas. Project activities at the point of diversion will include the removal of vegetation, excavation of soil, construction of an earthfill dam, and installation of water control pipes and structures. Water from the reservoir will tie into an existing line that is currently served by a groundwater well and pump. The reservoir dam, when completed, will be approximately 150 feet in length and 24 feet in vertical height. The reservoir will have a surface area of about 4 acres when pooled to maximum permitted capacity.	NOD	
2000022029	Flood Control Improvements Along the Mainstem of the American River Sacramento Area Flood Control Agency Sacramento--Sacramento, Placer, El Dorado The project involves modifications to Folsom Dam and levees along the lower American River. The elements of the project include reoperating Folsom Dam on a long-term basis, modifying Folsom Dam's outlet works, equalizing levee heights along the lower American River, constructing a closure structure at the mouth of the Mayhew Drain and a pumping facility as appropriate, to prevent the backup of floodwaters on the Folsom Boulevard side of the closure structure, and increasing	NOD
